

Why beU Skin Care

HYPO-ALLERGENIC (LESS LIKELY TO CAUSE AN ALLERGIC REACTION)

Hypo-Allergenic: less irritating, and better for you ingredients than other brands.

pH BALANCED

It has become practice to use the pH scale to determine the degree of acidity or alkalinity of a product. Your skin and hair are slightly acid, with a pH factor between 5 and 6. This is called an "Acid Mantle" and is a protective shield for the skin and hair. It is vitally important that nothing should be applied to the skin or hair that is excessively alkaline or acidic in nature.

The pH of our skin is important. Our Skin Care Products are pH Balanced in the formulations and in their action on your skin.

STRICT QUALITY STANDARDS

All of our Skin Care Products are formulated according to strict controls and standards. The ingredients are tested when they come into the lab. Then they are blended carefully, and each batch is tested again. We also have finished products sent out to an independent laboratory for further testing.

We are determined to have the highest quality, gentle most natural products. This has always been our sincere motivation.

THE RIGHT COMBINATION OF INGREDIENTS

From antioxidants, to moisturizers and natural botanicals – each product is formulated to provide beautiful benefits for radiant skin.

Protect the skin from environmental elements; Leave the skin feeling clean and refreshed.

OUR PRODUCTS DO NOT CONTAIN OR ARE FREE FROM...

Parabens or Sodium Lauryl Sulphate, Sodium Laureth Sulphate, Harsh detergents, Petro chemicals, Artificial colours, Synthetic fragrances, Mineral oil or any other Harsh chemicals. We use the best of Organic ingredients wherever possible from round the world.

beU by ORGANO™

We create beautiful gentle products that are kind to you and the planet. They are the perfect combination of nature and science.
